Unmatched
Microsoft Expertise

STRENGTHENING YOUR MICROSOFT 365 ENVIRONMENT

Cyber threats are no longer just an enterprise problem—**small and midsize businesses (SMBs)** are prime targets. **43% of all cyberattacks target SMBs¹**, yet only **14% have adequate defenses in place¹**. Even more alarming, **60% of small businesses close within six months of a cyberattack²**.

You've done the cybersecurity basics—installed antivirus software, changed passwords regularly, trained employees on phishing. But **these steps alone aren't enough**. Cybercriminals exploit security gaps that most SMBs overlook.

Fortify provides an all-in-one security framework built on Microsoft's best practices, delivering enterprise-grade protection at SMB-friendly pricing.

WHY FORTIFY

- 1 Aligns with compliance standards:**
GDPR, CJIS, HIPAA, CMMC, CIS18, PCI DSS, and more.
- 2 Improves security posture:**
40% average improvement in Microsoft Secure Score.¹
- 3 Optimized Microsoft 365 licensing:**
Reduce costs while enhancing security.
- 4 Security automation:**
Faster threat detection and response than human intervention.
- 5 Tailored to your business needs:**
Configurations designed to support operational workflows.
- 6 Reduces cyber insurance premiums:**
Up to 30% savings through proactive security measures.²

THE FORTIFY/365 FRAMEWORK: FOUR LEVELS OF PROTECTION

FOUNDATIONAL SECURITY

F1

IDENTITY & EMAIL PROTECTION

- MFA & Entra ID
 - Advanced Email Security (Defender for Office 365)
 - Security Baseline Configuration for M365
 - 24/7 Identity Monitoring & Protection
 - Microsoft 365 Backup & Disaster Recovery
- Outcome:** Strengthens identity & email security—the first line of defense against cyberattacks.

F2

DEVICE SECURITY & ENDPOINT PROTECTION

- Managed Device Security with Intune
 - Defender for Endpoint (EDR/XDR) Threat Detection
 - Automated App Deployment & Patch Management
 - Real-time Threat Response & Containment
 - 24/7 SOC Monitoring
- Outcome:** Ensures every business device is protected and compliant, reducing risk from malware, ransomware, and unauthorized access.

OPTIONAL

F3

DATA PROTECTION & COMPLIANCE

- Sensitive Information Protection & Encryption
 - Data Loss Prevention (DLP) for M365
 - Secure Collaboration Controls for Teams, SharePoint & OneDrive
 - Defender for Cloud Apps & External Sharing Governance
 - Automated Compliance & Audit Readiness
- Outcome:** Protects sensitive business data from unauthorized access and leaks while ensuring regulatory compliance.

F4

AI-READY SECURITY & FUTURE-PROOFING

- Advanced AI-Driven Threat Detection
 - Copilot for Microsoft 365 Readiness & Security Controls
 - Secure AI Implementation for Business Operations
 - Cyber Risk Assessments & Executive Reporting
 - Continuous Security Optimization & Automated Policy Enforcement
- Outcome:** Prepares your business for the future by integrating AI securely, optimizing IT operations, and proactively mitigating emerging threats.

“CTS's Fortify solution has been a quiet but powerful protector for our business. It sits in the background, vigilantly safeguarding our systems and data, giving us the peace of mind to focus on caring for our patients. The fact that we haven't had any issues is a testament to how well Fortify works - no news is good news when it comes to cybersecurity.”

Dr. Chris Grucella, Owner Willamette Falls Pediatric Group

YOUR SECURITY MAY HAVE CRITICAL GAPS

Myth: "We have antivirus software, so we're safe."
Reality: Modern malware evades traditional antivirus **76% of the time.**¹

Myth: "Regular password changes keep us secure."
Reality: Without MFA, **99.2% of breaches** still succeed through weak credentials.²

Myth: "Our staff is trained on security."
Reality: **95% of cybersecurity breaches** are caused by human error, even in trained organizations.³

YOUR BUSINESS, FORTIFIED FOR GROWTH

Continuous security updates to stay ahead of evolving threats.

Automated security enforcement to eliminate vulnerabilities before they escalate.

Seamless deployment with minimal downtime for your business.

Proactive risk management to improve resilience and safeguard revenue.

ACT NOW!

Secure your data, meet compliance and stay ahead of cyber threats.
