

MICROSOFT-FOCUSED SLG SECURITY & COMPLIANCE

Keep essential services running—securely, reliably, and audit-ready.

 **Microsoft is our core:** identity, security, cloud & governance.

 **Our job:** reduce disruption risk, improve resilience, and make compliance achievable for lean teams

CSP Manage

Problem: Microsoft licensing is confusing and costly.

Brief: Benchmark your Microsoft 365 licensing + security to reduce waste and improve protection.

What you can expect:

Right-fit licensing guidance
Quick-win security improvements
A prioritized action plan

SkyDesk 365

Problem: Remote access is fragile and risky.

Brief: A secure cloud workspace designed for continuity and compliance-driven environments.

What you can expect:

Secure access without VPN pain
Better continuity during disruptions
Easier management and support

Co/Managed Services

Problem: You need more than break-fix support.

Brief: Microsoft-first support that keeps things running and helps you adopt smarter, more efficient ways to work, securely.

What you can expect:

Extra capacity and strategic guidance
Faster resolution with clear reporting
Modern operations built for what's next

Fortify

Problem: Security gaps create disruption and risk.

Brief: A structured, Microsoft-aligned cyber-hardening approach built for lean teams.

What you can expect:

Phased plan by priority
Measurable security improvements
Clear documentation and reporting

Compliance

Problem: Frameworks change faster than budgets.

Brief: We translate CJIS, CIS18, NIST and more into practical work tied to Microsoft controls.

What you can expect:

Roadmap you can execute
Audit-ready documentation support
Less chaos, more confidence

What long-term partnership looks like:

- Ongoing improvement, not one-time fixes
- Leader-friendly reporting and documentation
- A Microsoft-first roadmap for the future

A CLEAR PATH FORWARD (Without a big-bang overhaul)

Four steps that build resilience, reduce audit stress,
and earn long-term confidence.

STEP 1 - SECURITY SNAPSHOT:

Security Score Assessment
+ Microsoft 365 Benchmark

What you get:-

- Email protection settings review
- Dark web exposure check
- Microsoft 365 Security Assessment
- Scorecard + quick-win plan

Why it matters: Quick wins reduce risk fast and clarify next steps.

STEP 3 - COPILOT READINESS:

Secure AI enablement

What you get:

- Security + governance readiness review
- Oversharing risk reduction guidance
- Practical rollout recommendations

Why it matters: Copilot should amplify productivity—not exposure.

STEP 2 - FORTIFY:

Microsoft cyber-hardening

What you get:

- Phased hardening by priority
- Governance + documentation support
- Roadmap aligned to your frameworks

Why it matters: Progress stays measurable and realistic for lean teams.

STEP 4 - SKYDESK 365

Continuity + secure remote work

What you get:

- Secure cloud workspace access
- Continuity during disruptions
- Managed support to keep moving

Why it matters: Continuity shouldn't hinge on one building—or one person.

FUNDING & GRANT SUPPORT

We help you identify potential options, align projects to requirements, and build justification.

Funding availability changes and is never guaranteed.
